Proven to work!

TRIFLEX® Windows

LIVE ONLINE TRAINING FOR STATICS ANALYSIS!

Live Online Training: *Open registration* for up to 15 seats for *Any of the dates listed below in 2023!* Or, Schedule your own with 3-15 people.

If you have 3-10 people, your company can schedule their own customized seminar.

We can offer Live Online TRIFLEX Statics Analysis training for 5 days (20 hours live online, and online lab work) for \$800 per person with a minimum of 3 and maximum of 15 people/attendees. We can adjust to YOUR schedule.

This is a better value to the customer not only because of the saved travel expenses, but also because we can offer the full Statics Analysis Live Online Course for less than the traditional on-site seminar. We can still deliver the same results and we will work towards customer satisfaction. After hours help is available.

Online Live Training!

CEU's (Continuing Education Units)	Yes

What our attendees say about TRIFLEX online training...

“The TRIFLEX class with Piping Solutions is essential to fully understanding the software. The company had many experts participating in the training class who helped me to understand details on each topic. They teach you how to make your models simple and be aware of the important steps to focus on in every model. I am confident that Piping Solutions are experts on this subject and will continue to use Triflex and their support on future projects.

Thanks again!”
Peter with Snolab

“I want to thank you and the Piping Solutions group for the terrific course I attended back at the end of April ...
The course was extremely useful for learning to use the software including the way in which it applies the codes. The software is indeed a very powerful program I am sure to use in the future.”

Jack with Southland

In what ways can we customize our training for your company?

We offer optional subjects like jacketed piping, rotating equipment, etc. We will send you a form to determine your needs. We can also look at your company's sample modeled system in the off hours.

We are looking forward to further developing a working relationship with you and your company in the near future.
